

# Keys to Develop Critical Thinking Mindsets

Drive organizational strategies, change, innovation, projects and customer value propositions.

## Overview

In a latest 2020 article 6000 millennials were asked to rate the top 3 skills most important for them to prepare for the future and 73% rated Critical thinking as being #One. Critical thinking is far from thinking about critical matters. It is about the ability to think clearly and rationally -utilizing your capabilities to work with things, restore them, sail through turbulent times, innovate new pathways and develop newer ways of thinking.

## Learning Outcomes

This workshop intends to help learners appreciate the anatomy of a critical thinker and develop a competence map of critical thinking. It helps assess oneself and put into practice one's own critical thinking capabilities.

## Your takeaways

1. Critical thinking Definition
2. Anatomy of a critical thinker
3. Critical thinking mindsets
4. The 4 key elements
5. Critical thinking as a competency for success
6. Your own critical thinking meta map
